WORK EXPERIENCE

Software Engineer

Affimintus Technologies

09/2022 - Present

Remote, India

Achievements/Tasks

- Successfully developed and deployed a couple of major solutions including HR Management system and CRM solutions
- Identified, analyzed and documented product requirements, converted requirements into userfriendly functionalities, testing and deployment onto client's infrastructure
- Developed multiple plugins using C# for various custom functionalities required in modules
- Collaborated with other technology teams to define protocols, REST API's, and data acquisition
- Created solutions using Dynamics 365 CRM and handled multiple dashboards using Excel, Power BI, SSRS, and SSAS
- Developed business plans, business process flows, requirement specifications, user documentation, and workflows
- Developed technical skills including MySQL, Java, JavaScript, REST API, Agile, and D365.

Business Development Executive- Part Time

Litigation Analytics Institute

05/2025 - Present

Toronto, Canada

Achievements/Tasks

- Manage end-to-end sales pipelines using HubSpot CRM, including automation workflows, lead nurturing, and client engagement tracking.
- Conduct discovery calls, product demos, and onboarding sessions to deliver tailored analytics solutions to legal clients.
- Collaborate with cross-functional teams to align business goals with project timelines, ensuring efficient execution.
- Use advanced Excel functions for forecasting, budget tracking, and performance dashboard creation. Handle invoicing, payment reconciliation, and financial reporting through QuickBooks Online.
- Oversee CRM and application enhancements, gather user feedback, and lead UAT for new features.
- Identify process inefficiencies and implement automation to enhance client response time and operational workflow
